

16th Lme

Meeting with
Coastal Partners

Paris (FR) 8 - 11 July 2014

Potential contribution of capacity development in ocean governance to the LME Programme through IOI

Author: **Werner Ekau**

Institution: **IOI-Germany**

Session: **4 (Capacity Development)**

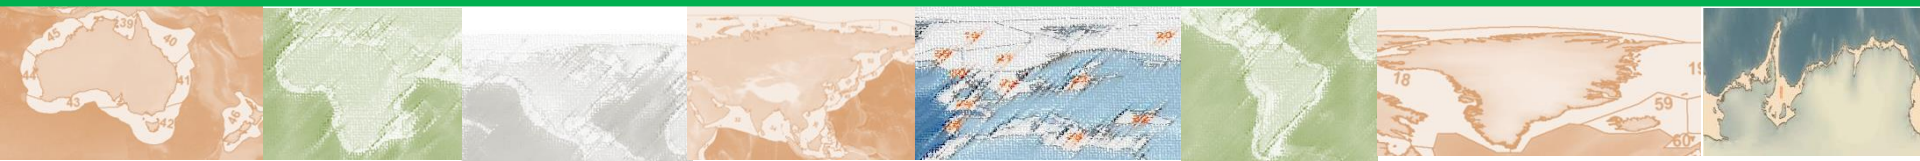

Day of presentation: **10 July 2014**

Needs in CD

LME meeting 2012 : How to create 10000 practitioners?

- Improve environmental knowledge and understanding of consequences at all levels: science, administration, public
 - Increasing scientific capacities
 - Strengthening knowledge base in administration
 - Strengthening public knowledge
- Strengthen local/national institutions (High schools, universities, polytechnical schools etc.) to build a new generation
 - support of partnerships in building BSc or MSc study programmes
- Improving the political will for action by improved information and understanding of environmental problems
- Improve exchange of information between the levels and disciplines

IOC WG on CD

IOC/EC-XLVII/2 Annex 7

DRAFT CAPACITY DEVELOPMENT STRATEGY FOR 2014–2021

Four Pillars

Academic and technical qualifications

Ocean Policy

Infrastructure

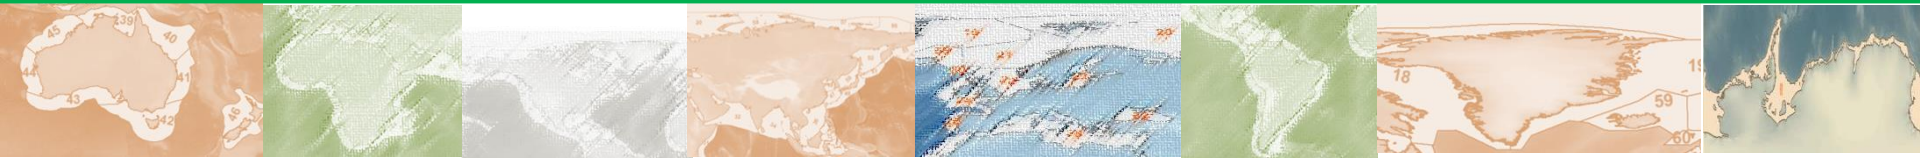

Use of Oceanteacher

Academic qualifications

“Encourage countries to invest more in ocean education to strengthen universities and technical institutions”

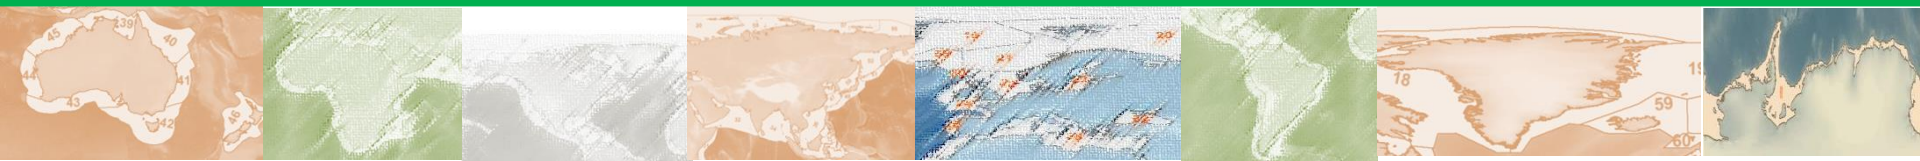

Ocean Policy

“There is a need in some Member States to enhance awareness among a broader community of the government officials.”

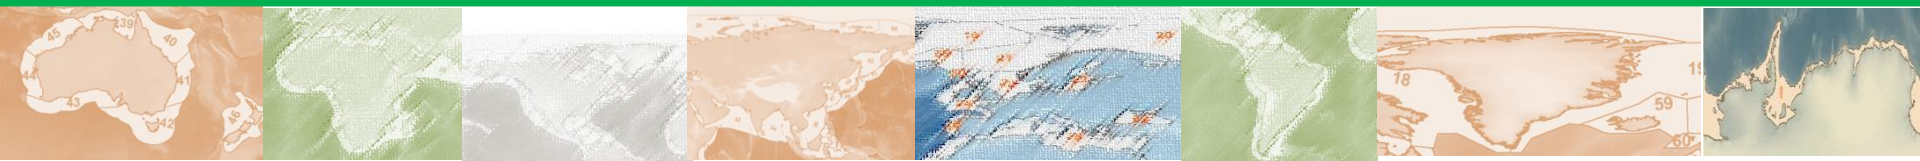

- IOI is an independent, global, non-governmental, charitable international organisation that responds to new and emerging challenges in a fast changing globalised world.
- IOI is a knowledge-based institution that conducts training and capacity building to meet the crucial demand for knowledgeable future leaders in ocean governance.
- The respect for common goods, the peaceful and sustainable use of ocean services and resources, the common heritage of the high seas and the need to support and empower people and countries, particularly developing countries in managing their relations with the ocean in a sustainable manner remains the ethical and moral foundation of the (new) IOI.

The core activity of IOI is to carry out Training Programmes in Ocean Governance.

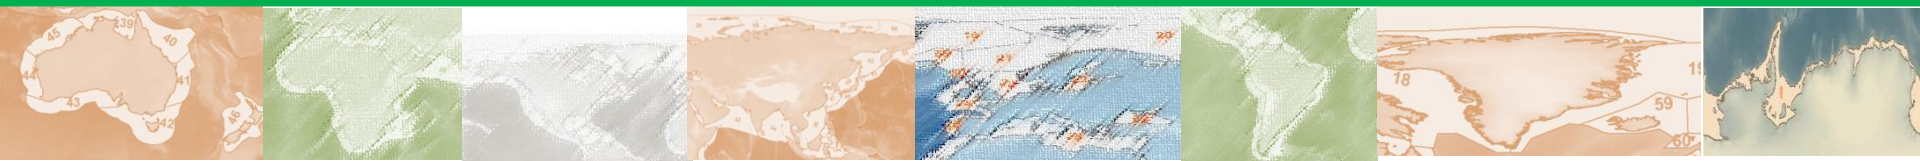

Operational Targets

- In 3 years time, the International Ocean Institute will have established and be regularly implementing at least 5 fully operational annual training programmes on ocean governance with one in each major ocean region of the globe.
- We will train at least 100 young and midcareer practitioners annually particularly from developing countries and countries in transition in the most contemporary approaches to coastal and ocean management, with an emphasis on moral, ethical and legal values in Ocean Governance (equity and peaceful uses of the ocean).
- This will result in a growing global network of trained and empowered leaders who are fully conversant with the latest developments in ocean governance and have acquired the knowledge, skills and essential attitude that are required for effective ocean governance of the planet's precious resources.

Course programme

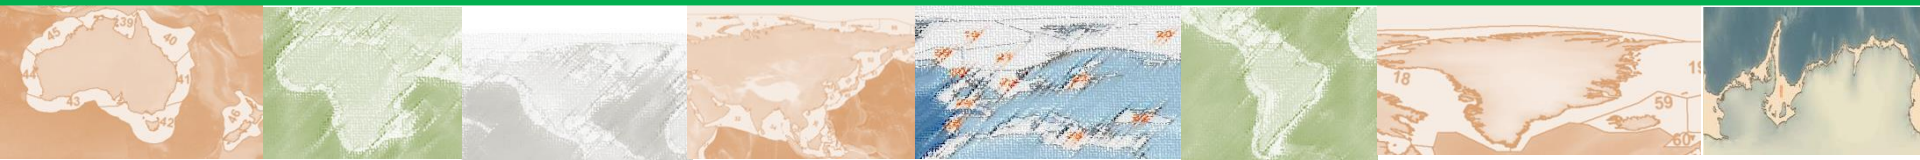

- Ocean Governance at Dalhousie University
- Regional Training programme in Malta on Mediterranean, Black, Caspian and Baltic Sea
- Regional Training programme in Cape Town, South Africa
- Regional Training programmes in Turkmenistan and China.
- Master Course in Ocean Governance in Malta

Geographical Outreach of Training Programmes

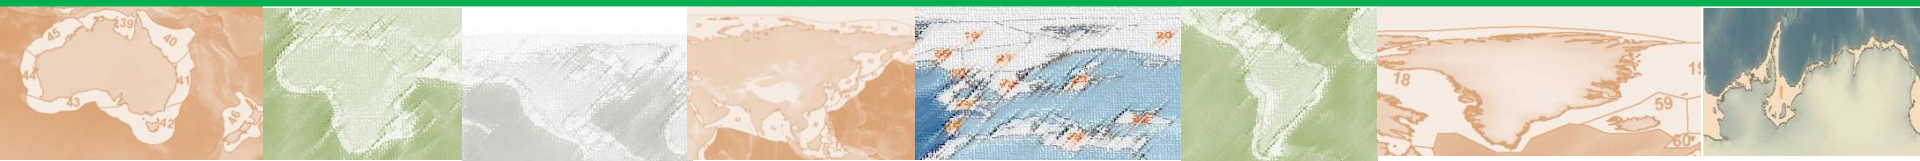

- Regional Ocean Governance Courses (regular) in Canada, Malta, S. Africa
- Regional Ocean Governance Courses (not yet regular) in Turkmenistan, China
- Operational Centers

IOI Training Course on Ocean Governance at Dalhousie

- Intensive, interdisciplinary, eight-week course conducted annually at Dalhousie University, Halifax
- Primarily for developing country professionals working in ocean and coastal-related fields
- Topics: Key issues in Ocean Science, Law of the Sea, Integrated Coastal and Ocean Management, Fisheries and Aquaculture, Marine Transportation, Maritime Security, Energy and Informatics
- Skills-development Sessions: Negotiation, Project Cycle Management, Disaster Management, Media, Communications
- Over 600 alumni from more than 100 countries

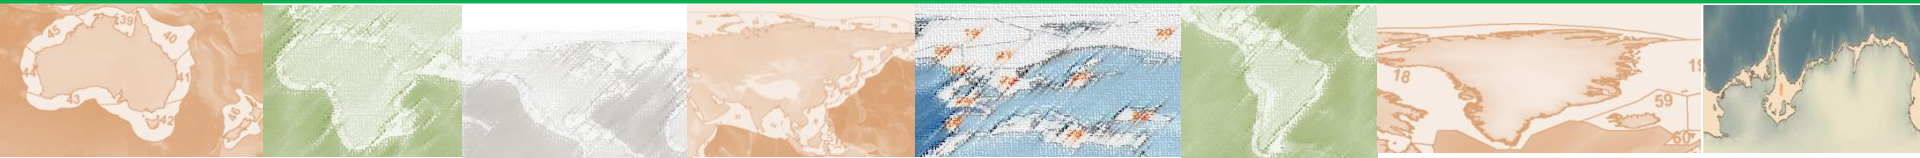

IOI Training Course on Regional Ocean Governance

IOI Malta Course Profile exported to other areas

- Original (Malta)
 - 5 weeks intensive course; annually since 2005
 - Accredited by the University of Malta
 - Targeting Mediterranean, Black, Caspian and Baltic Seas)
- Exported to China/West-Pacific region
 - 3 weeks intensive course
 - Targeting Western Pacific coasts
- Adapted to South Africa, Cape Town
 - 5 weeks intensive course; implemented 2013
 - Targeting African coast except the North

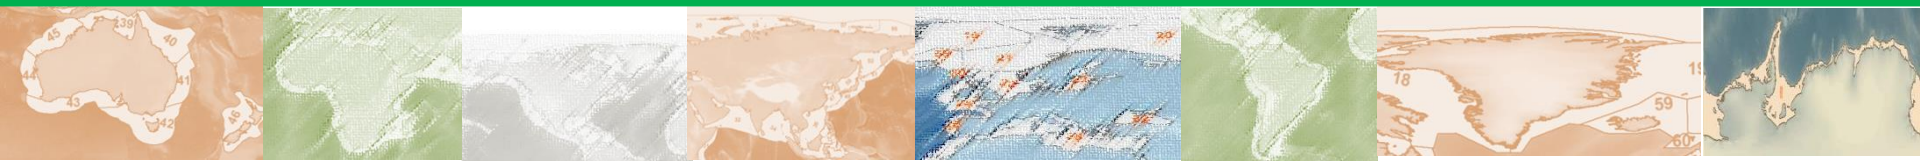

IOI Master Course on Regional Ocean Governance

Master of Art in Ocean Governance M.A.

- Lecture component of 12 study units
 - Programme over 13 months
 - 60 ECTS
 - Environment, Methods, Resource economics, Law of the Sea, Dispute Settlement, Maritime Security, Policy making,
- Research component
 - Dissertation (up to 25000 words)
 - 30 ECTS
- Admission requirements
 - Entry requirement is a first cycle degree
 - Tuition fee for this full-time program is 13500€

Potential LME - IOI Training Program relationship

- Ocean governance part could be covered (partly) by IOI regional courses
- Places for two more regional courses still under discussion. Where are needs of LMEs?
- Frequency of courses could be increased to two per year
- Further ideas ?
