

Enabling Transboundary Co-operation and Integrated Water Resources Management in the Extended Drin River Basin (The Drin Project)

Coordinated Action for a Sustainable Future
ULTIMATE GOAL

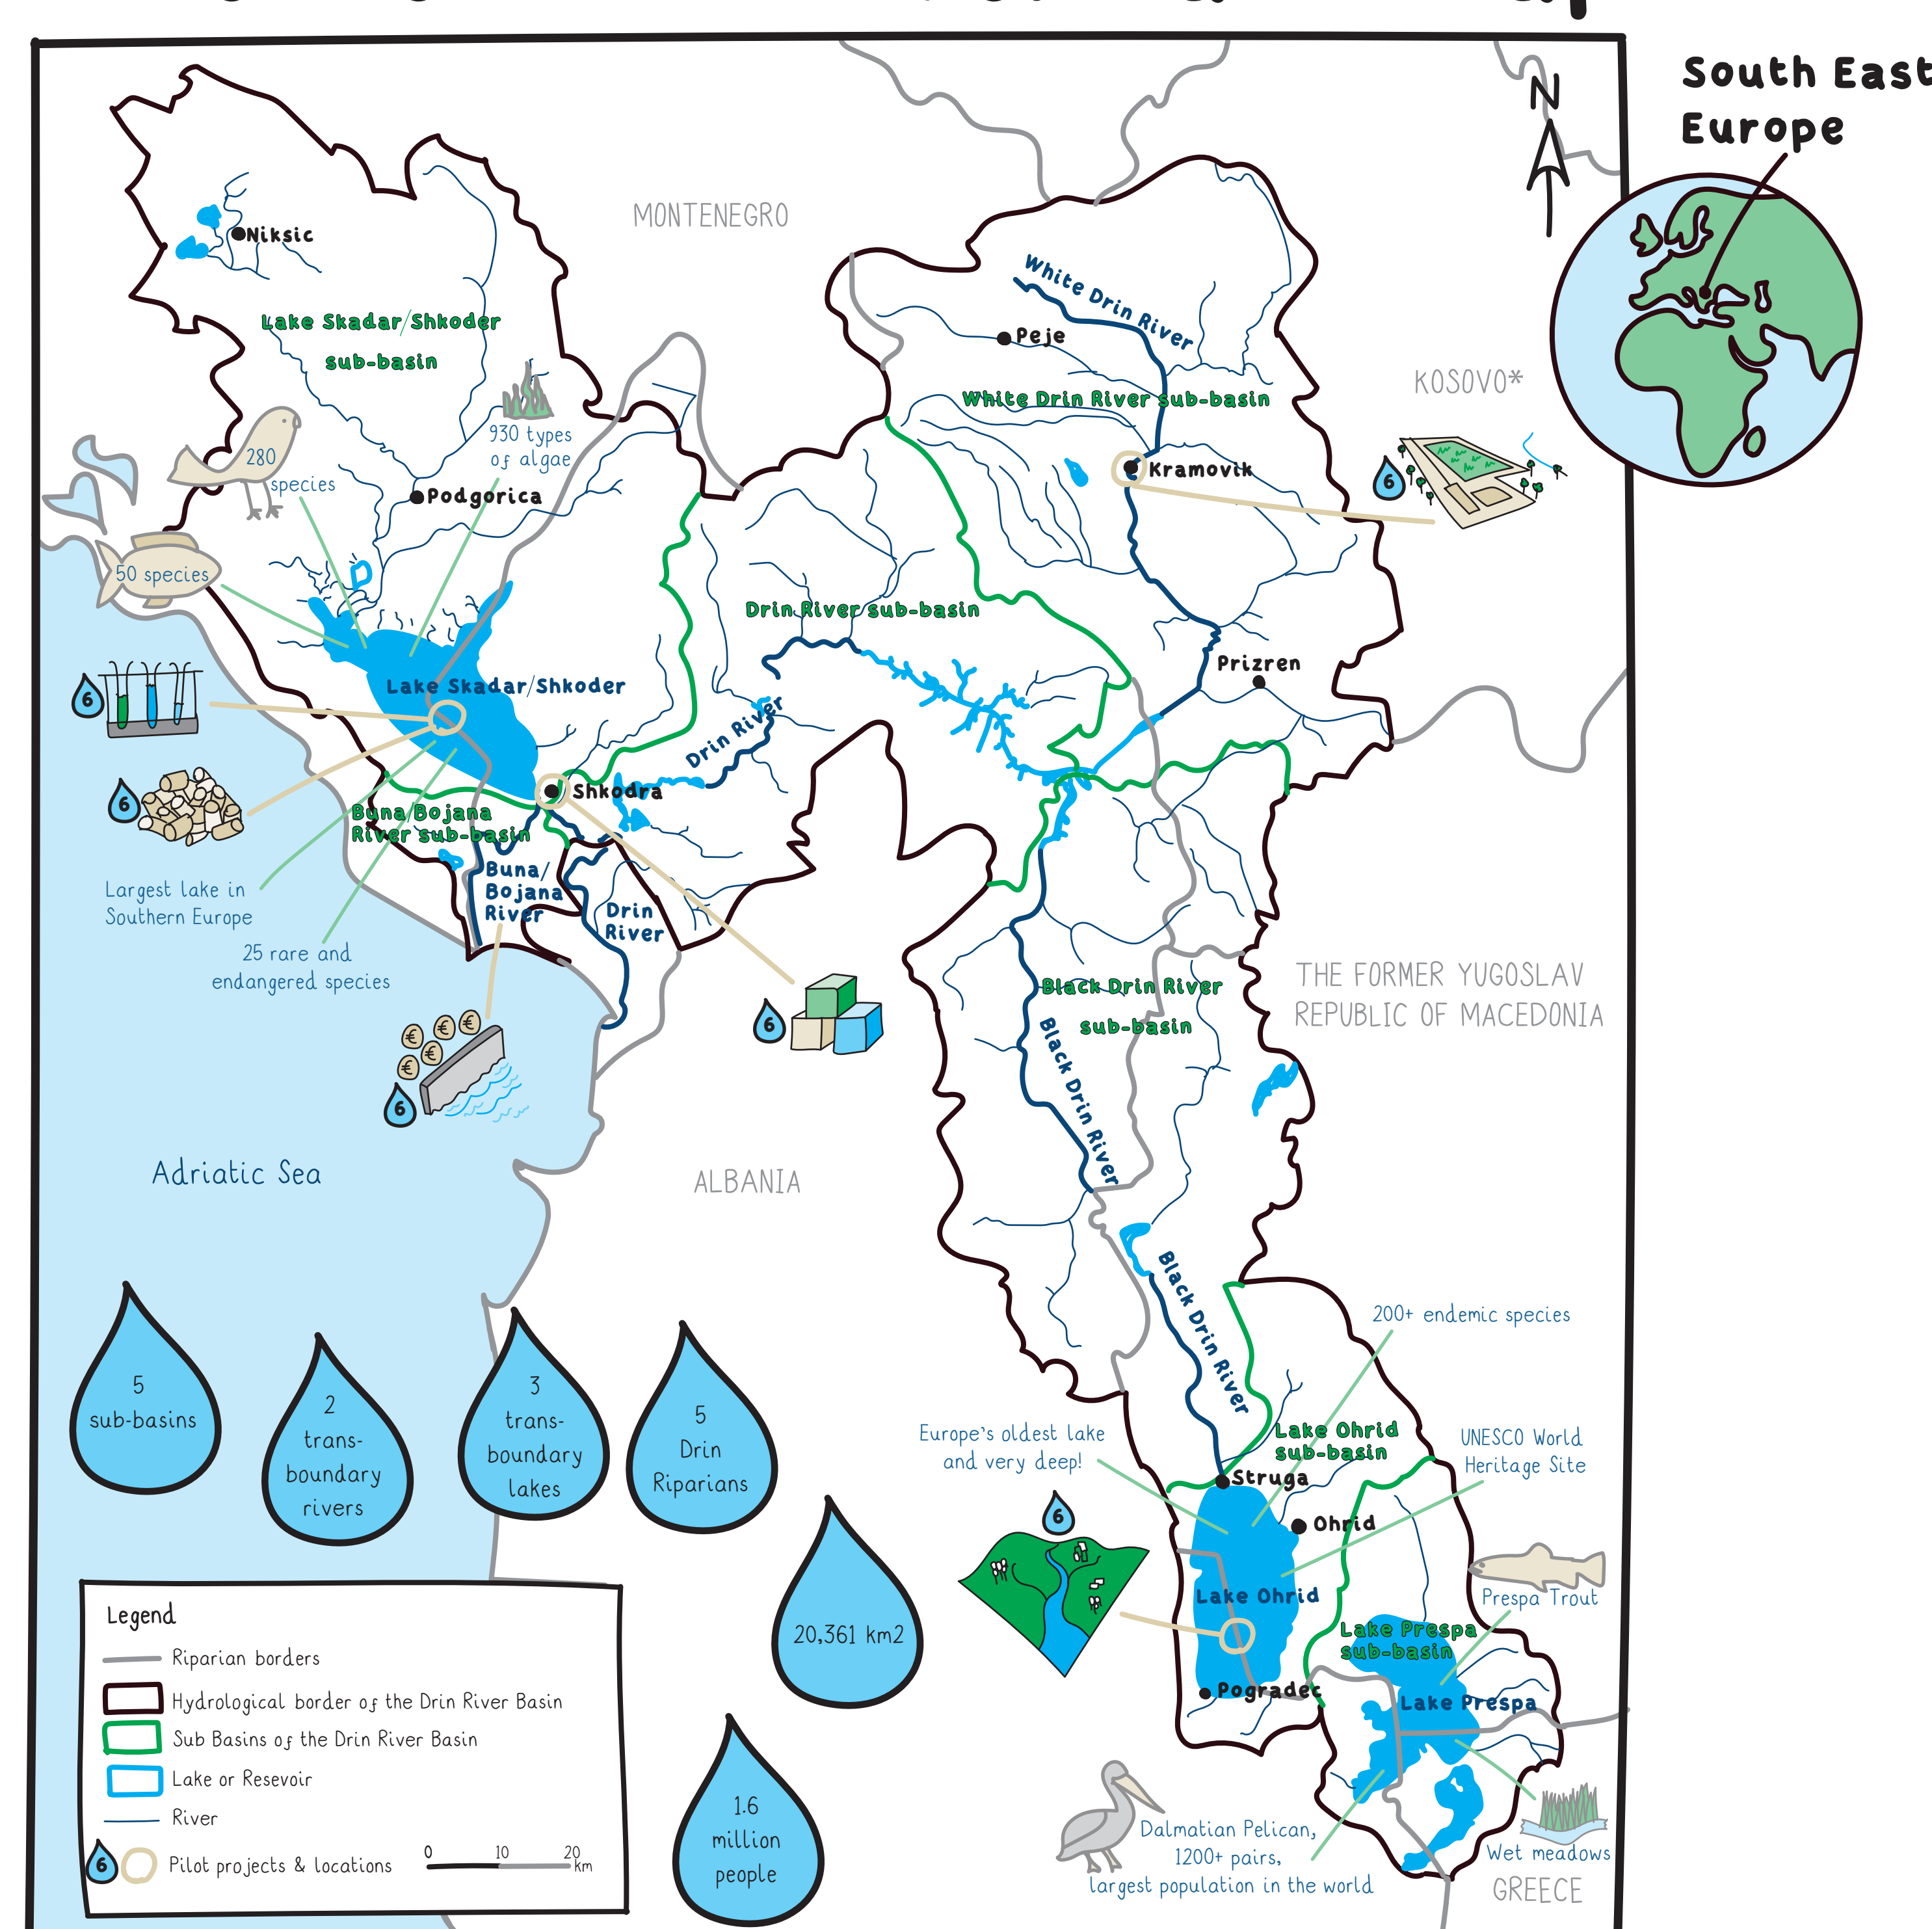

The Project under the
Coordinated Action enables

the implementation of

the operation of

Extended Drin River Basin Map

Important because of complex ecosystems, unique biotopes and indigenous species = **biodiversity hotspot**
Important from a European AND international perspective: sustains coastal, marine & freshwater ecosystems

1

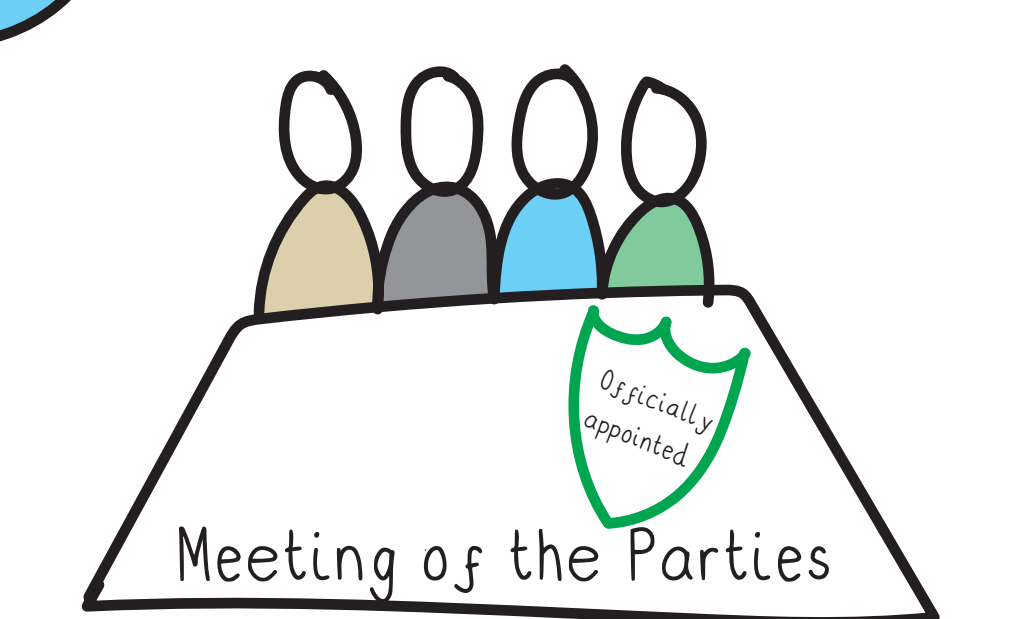

**Regional transboundary
water agreement in force**

The Drin Project will help implement the MoU

2

**Regional transboundary
institutional framework**

- Ministers from Riparians involved

- Representatives of the Riparians

DCG Secretariat - Global Water
Partnership-Mediterranean
(GWP-Med)

Provides technical and
administrative support to the DCG

Expert Working Groups - Experts from Riparians

Supporting the DCG to take decisions

3

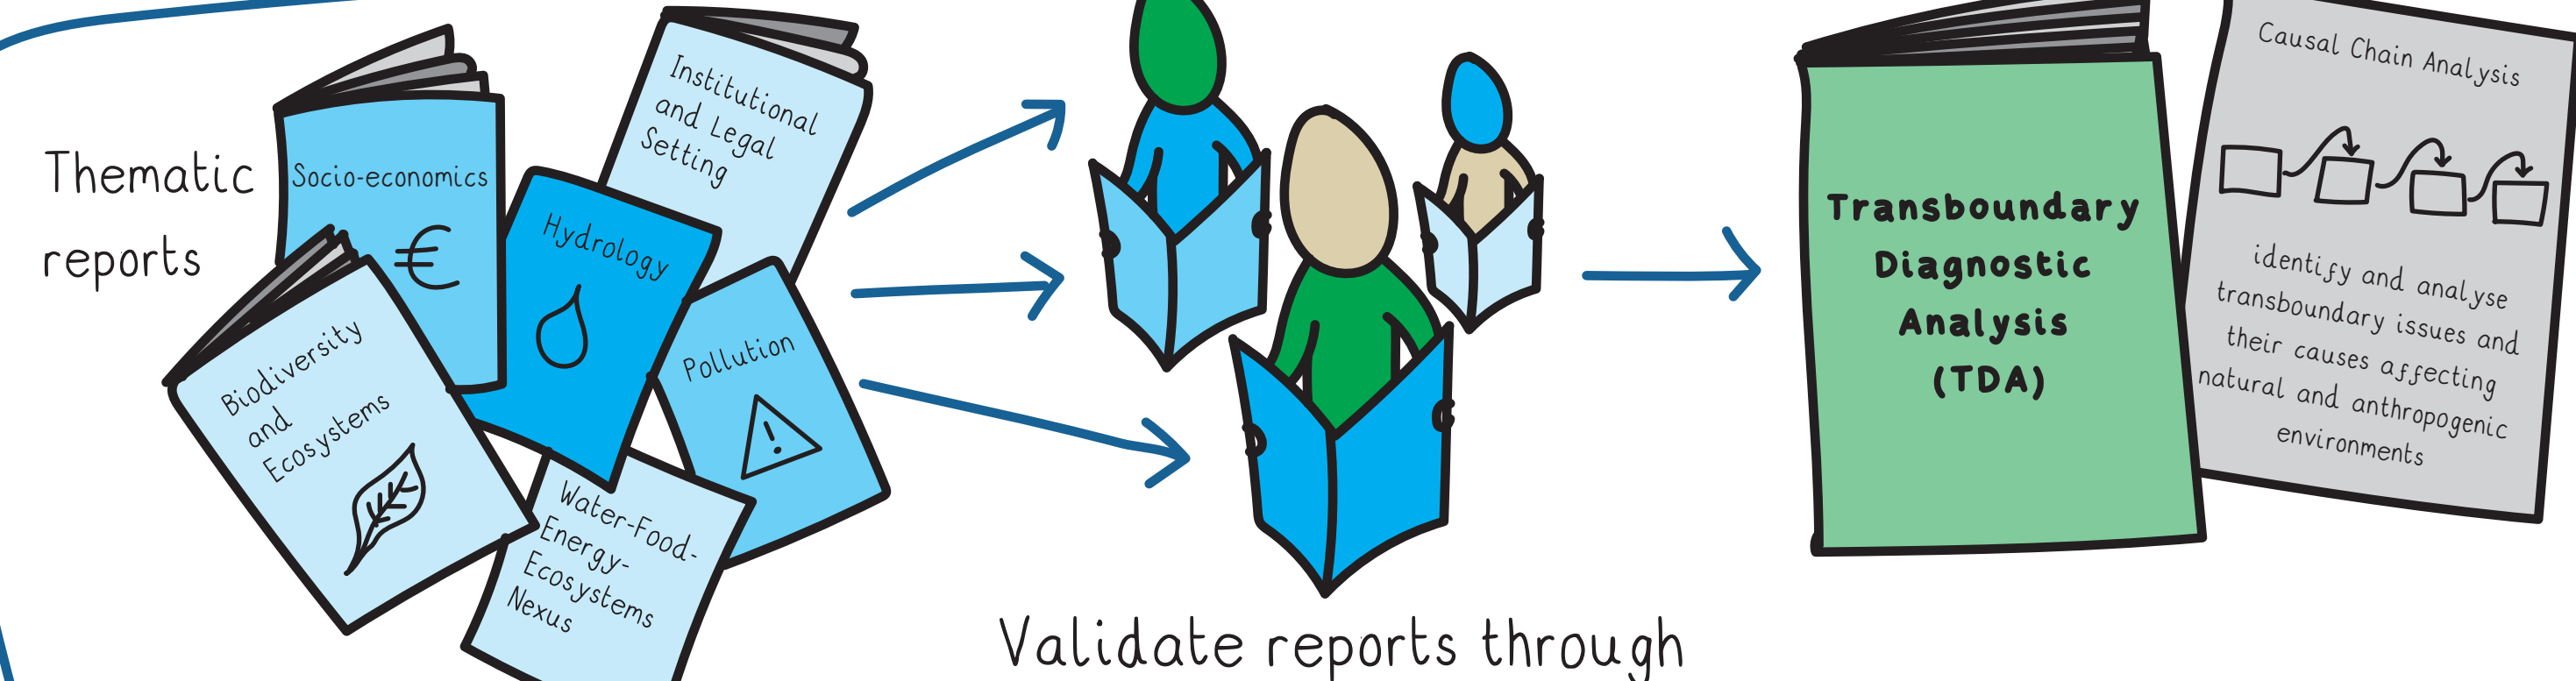

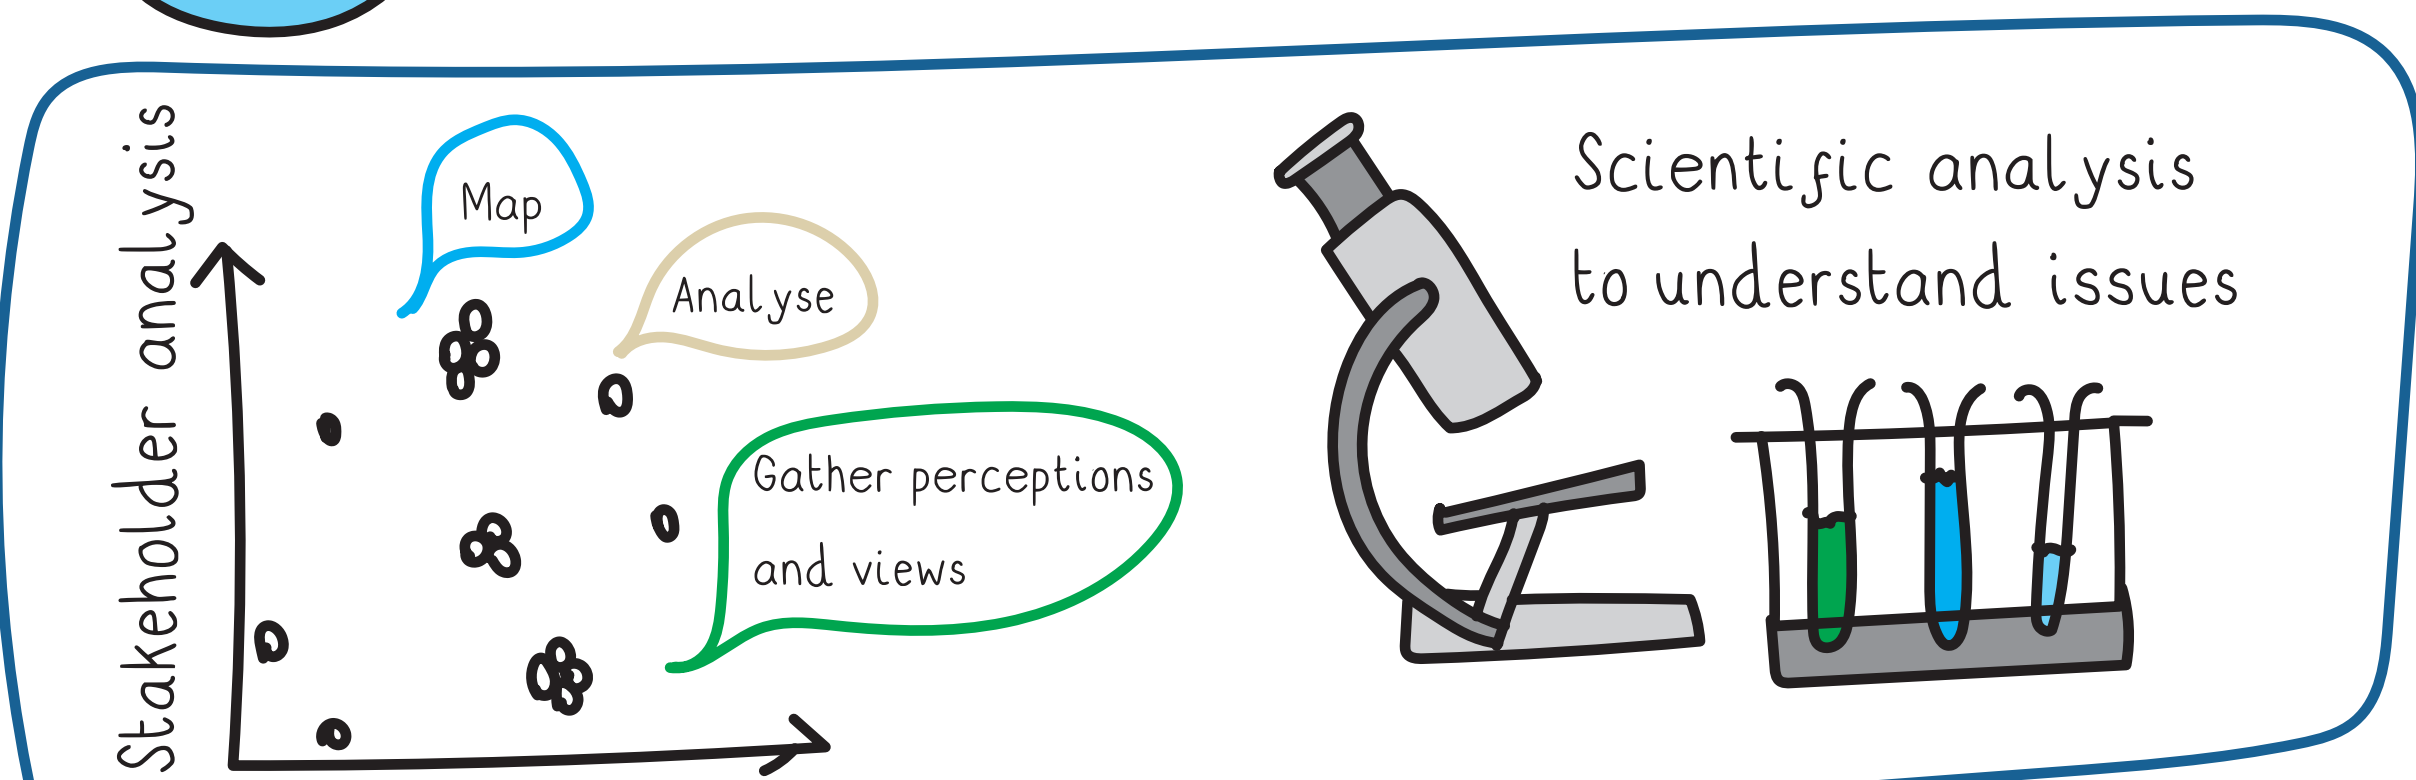

**National inter-sectoral
coordination mechanisms established**
(supplements 1 & 2)

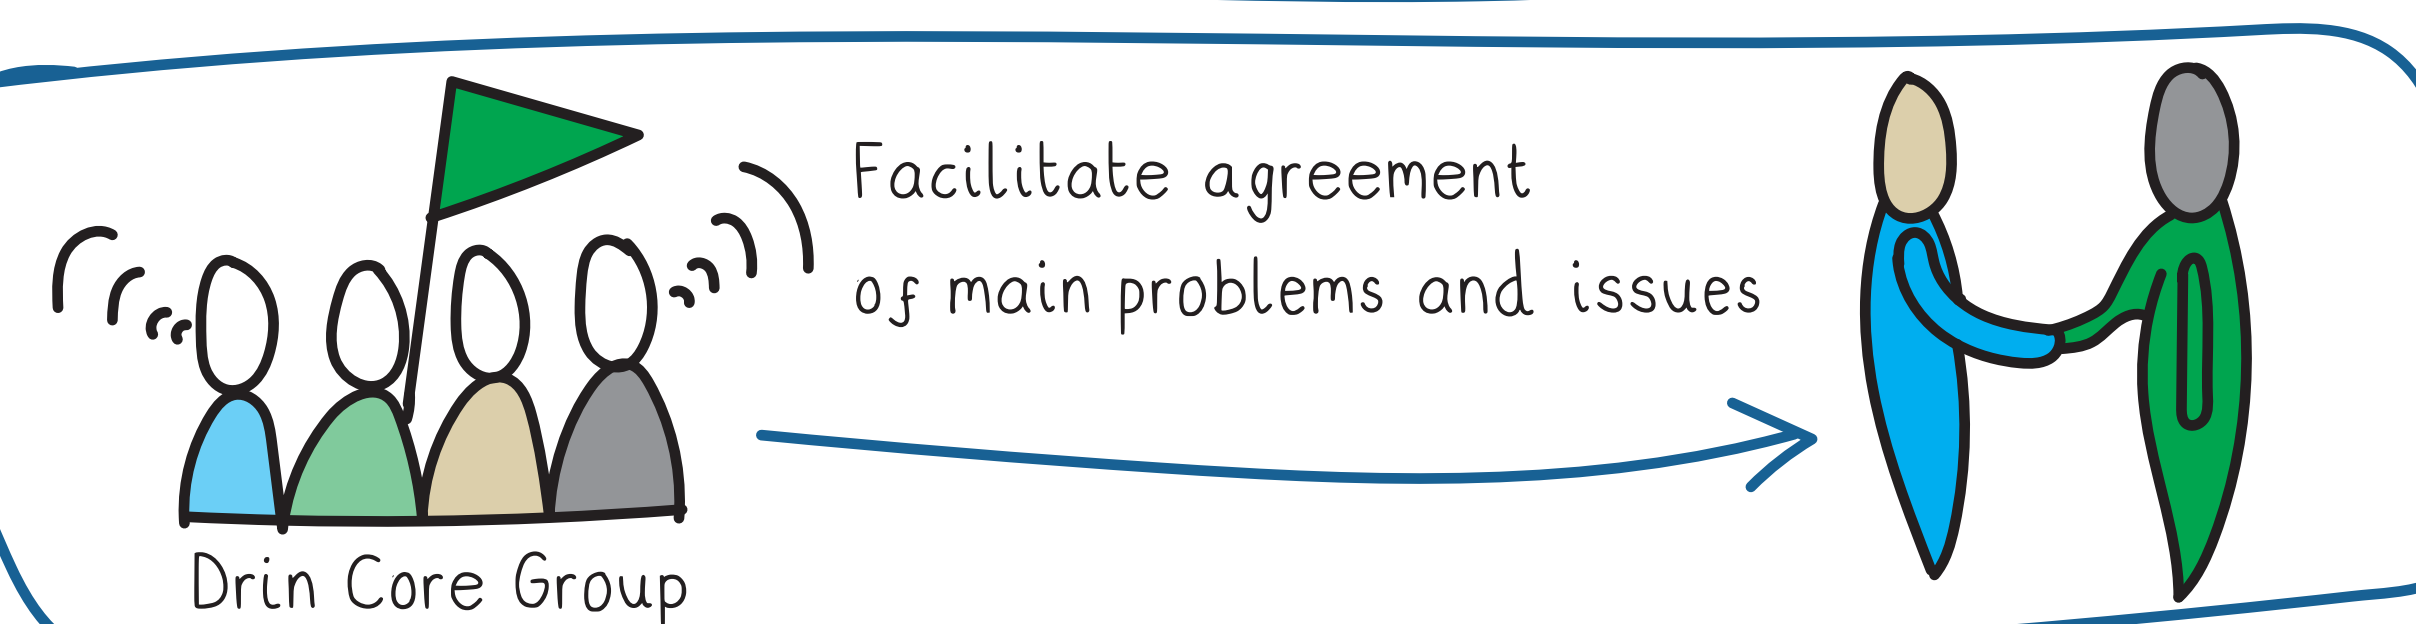

Government ministries
who have a stake in water use

4

**Riparians agree on
priority transboundary issues
and root causes**

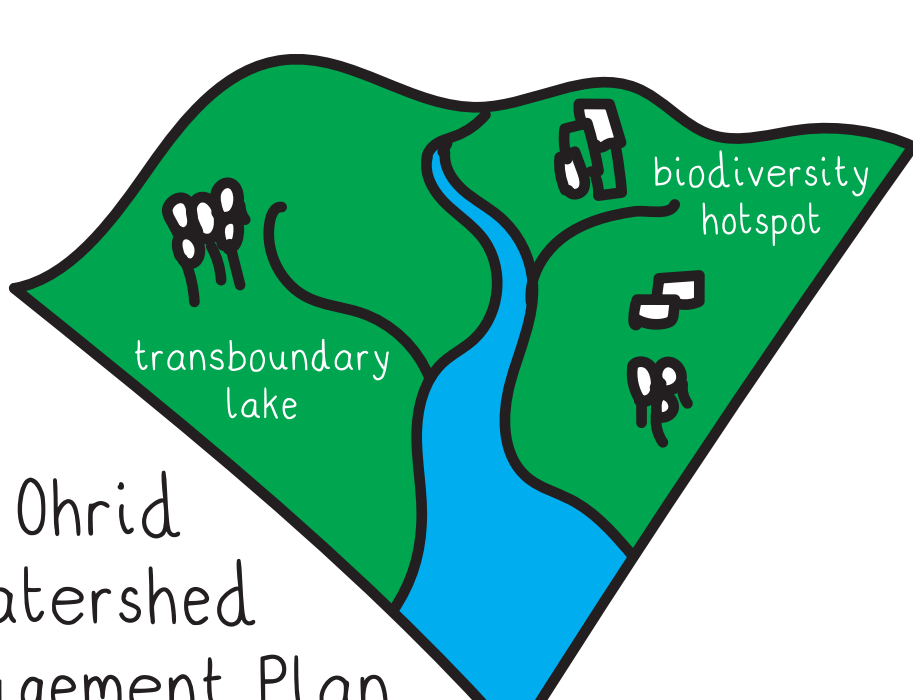

Validate reports through
stakeholder engagement

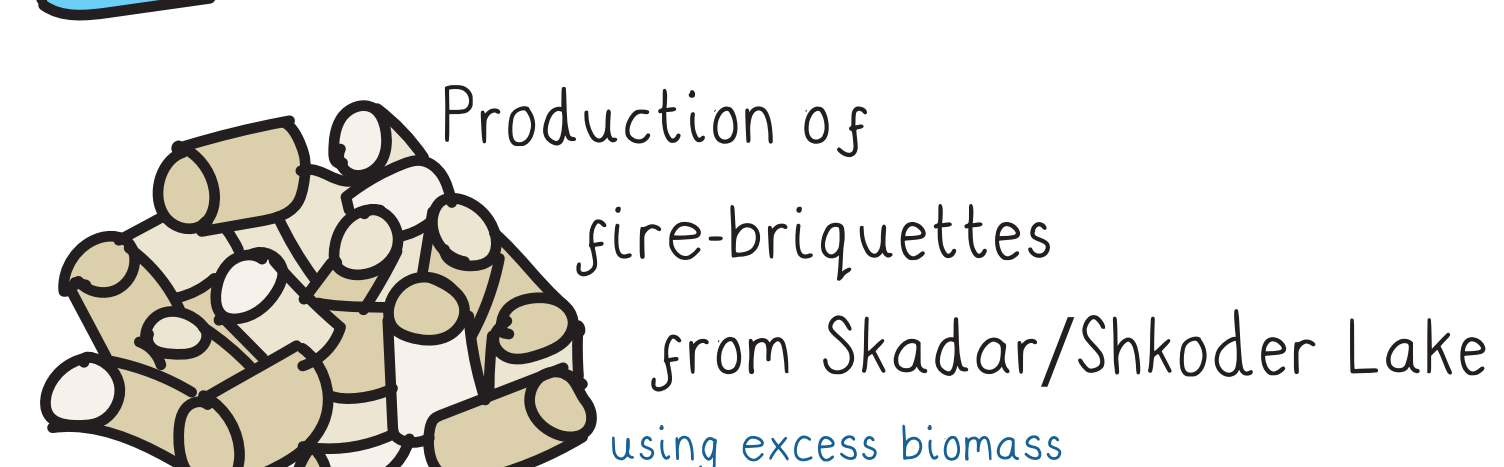

6

**Implementation of stress reduction
measures underway (to feed into future
SAP implementation)**

"NO REGRET" Pilot Projects

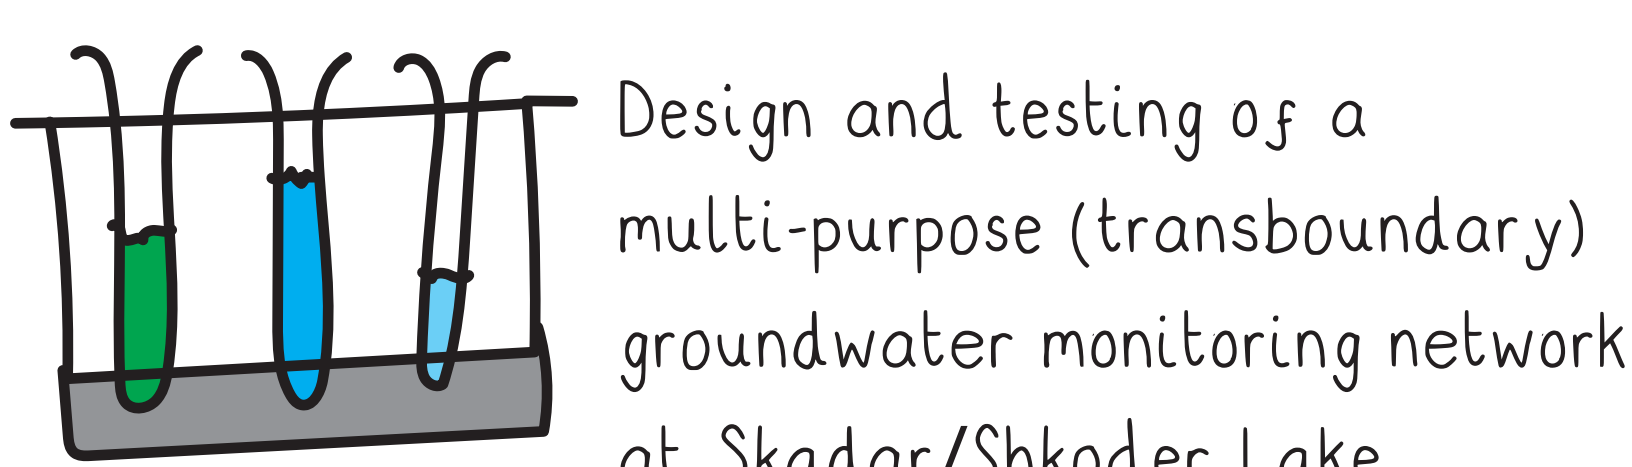

Integrated modelling
tool for Shkoder City

Assessing the feasibility
of applying micro-insurance
schemes in flood prone areas

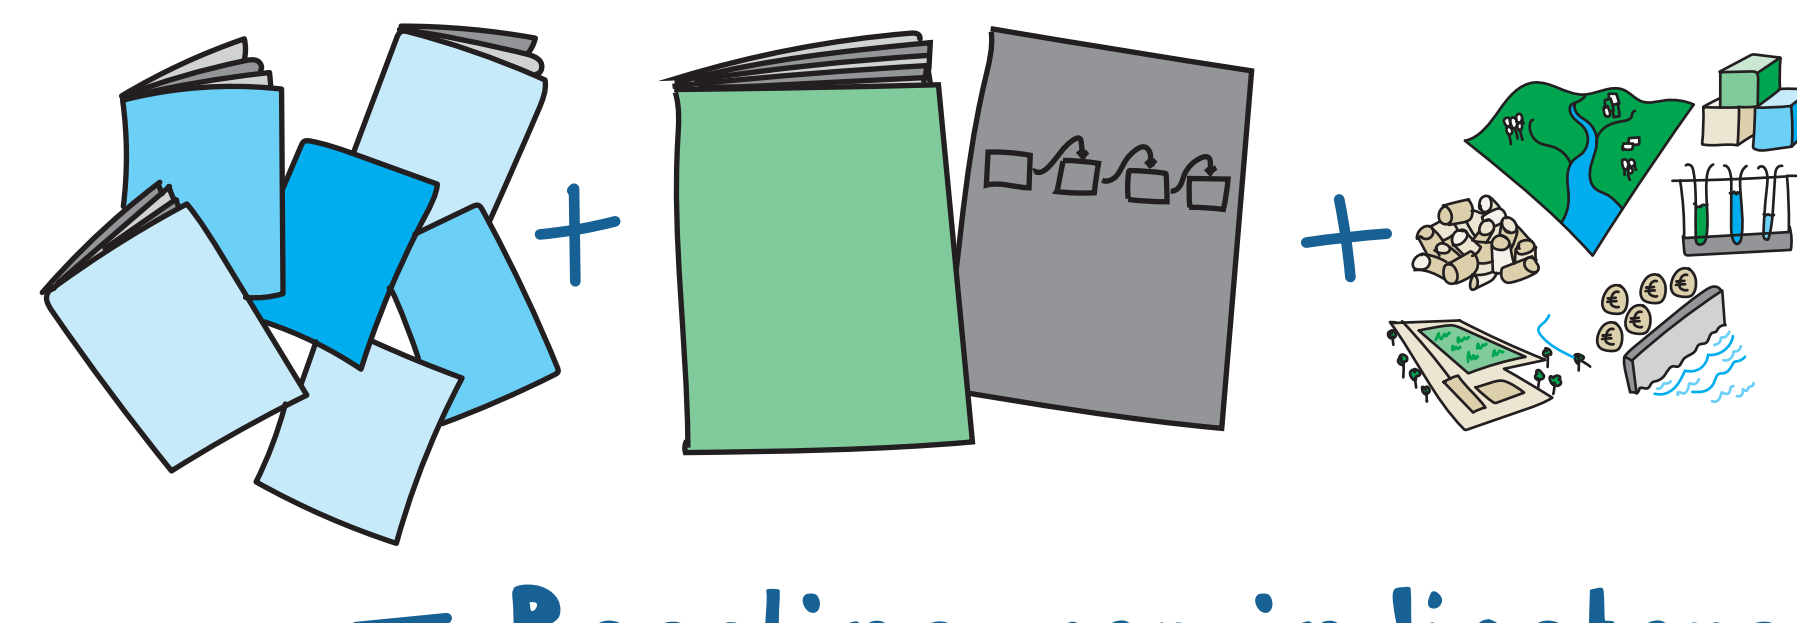

Constructed Wetland
in Kramovik

7

**Measurable environmental
and socioeconomic
status improvements**

Future steps:

Set up monitoring & evaluation programmes
to measure the **IMPACT** of the SAP
